## **BROWN, MICHAEL**

2014-5143 Exam Case

## Supplemental Microscopic Examination Report

Microscopic Slide Examination:

Tissue fragment: Sections of the tissue fragment from the "exterior surface of the police officer's motor vehicle" are consistent with a fragment of skin overlying soft (connective) tissue. There are features of desiccation/drying artifact present within the soft tissue. There is a granular layer present within the upper layer of stratified squamous epithelium. Focally, lightly pigmented keratinocytes are present within the basal layer of the stratified squamous epithelium.

M.D. Assistant Medical Examiner
